

OTOMECC S.R.L. was born as a family company in the late '70s operating in the field of design and manufacture of electroplating machines and collecting countless successes.

The thirty years of experience and the involvement of the top management are the strong points of the organization that have led OTOMECC S.R.L. to enter the main international markets.

The organization boasts a diversified customer portfolio both in the world of telecommunications and in the automotive and aeronautical sectors.

OTOMECC S.R.L. has equipped itself with an integrated Quality, Environment and Safety Management System, in order to improve the service it offers and to become a guarantee of correctness and competence in the territory for customers and interested parties, aiming to become a leader in the sector with an approach that focuses its attention on customer satisfaction, continuous improvement and compliance with sector regulations regarding environment and health and safety in the workplace.

In particular, the company is committed to pursuing the following objectives:

- Identify and meet the requirements of customers, users, local authorities, and stakeholders;
- Determine significant environmental and Safety impacts;
- To improve the quality of services in respect of the environment and safety at work by identifying and assessing the related risks, in the knowledge that this improves the effectiveness and efficiency of the services provided;
- Activate processes of continuous improvement;
- Comply with the applicable legislative requirements and other requirements that the company subscribes to;
- Use processes and technologies to improve the quality of service, to prevent and reduce risks to the safety of workers and users;
- Disseminate the culture of environmental protection and safety at work at the various levels of the organization and prevent, through actions of awareness, accountability and continuous training of employees, potential accidents that could have negative impacts on them.
- Communicate its policy to all suppliers and those who work for the organization;
- Maintain the integrated management system adequate, efficient and effective in order to be able to adapt quickly to changing circumstances and/or constraints outside the organization

Moreover, towards the customers, during the execution of the service, OTOMECC S.R.L. is committed to guarantee transparency and continuous monitoring of satisfaction in order to improve in a continuous and effective way the service offered.

OTOMECC S.R.L. is committed to guarantee a constant participation of the workers in order to continuously improve the Management System.

OTOMECC S.R.L. obtains supplies from its historical, qualified suppliers, on which it carries out continuous controls so that the material and means used are always in compliance with expectations and do not compromise the final result of the activity.

For its own operativeness OTOMECC S.R.L. entrusts to external companies (collaborators) part of the services guaranteeing a constant control on them. The organization, moreover, provides to directly control the Environmental and Occupational Safety aspects managed by external companies.

The processes entrusted to OTOMECH S.R.L. are monitored through the use of computerized tools for the management of the performances.

Through its work, the objective is to respect the customer's requests, safeguard the environment and respect the norms on health and safety at work, from which to draw for a constant improvement of its own processes, of its own company management.
